Bootstrap	
Tailwind Css	

## Workshops

React js  
by Mr.Akash Padhiyar sir

## Certificates

Veyg 2k23 Tech-Event  
Frontend Development-Css  
Tailwind -css

## Internship

1M	NETPAIR INFOTECH LLP React JS
15D	INFOLABZ IT SERVICES PVT LTD React JS

## Projects

### Pinterest

Create a Pinterest using Node.js, EJS, Express.js, and MongoDB. Enable users to sign up, create boards, pin images, explore and discover content, like, follow users. Implement responsive design, secure authentication, and authorization. Utilize MongoDB for database storage, include commenting, user profiles, and an analytics dashboard. Ensure error handling, social sharing, and deployment to a hosting service. Provide comprehensive documentation for developers.

### Text-Converter

 <https://github.com/AbhayGajjar/TextConverter>

To utilize text terminators effectively, one can employ various functions designed to streamline tasks such as removing excessive spaces, converting text to lowercase or uppercase, clearing text, copying text to the clipboard, and other similar operations.

### Online Food Application - Angular Js

Customers browse a digital menu, either on an app or website and place and pay for their order online

### R.news-TOP-HEADLINES-NEWS

 <https://text-converter-rpi2.vercel.app/>

you can read the latest news of any countries and select your categories of news which you might interested.

### Log-in page using React js & Firebase

"In this project, whenever a user log- in, their information is stored in Firebase. Therefore, the login page is connected to Firebase."

### IMDB web-site using API and React js
